Conveyor Networks provide a complete package for intelligent factory automation, software and logistics solutions. Our team has the ability and expertise to solve your warehouse and factory problems with a system tailored to your exact requirements.

Our priority is to look after you well and solve your issues, and we work with an excellent network of partners to make sure this happens. We don't walk away from our customers at the end of a project, we're a lifetime partner offering a spares and support package to suit your budget and needs.

A variety of clients

We work with a variety of clients - large and small - from the retail, e-commerce and manufacturing sectors and recognise the different needs and requirements of both types of business.

An experienced team

Our team have extensive experience with electrical, mechanical and controls systems as well as software development. We provide fully integrated solutions that give clients real return on investment, allow them to access the latest technologies and help them become more efficient and productive. In addition to our own expertise we have built long term partnerships with organisations such as Transnorm, Swisslog, Eurosort and others to ensure we can always provide the most appropriate solution.

Conveyor Networks were an excellent partner, their team worked closely with our own engineers to ensure the system met our exact needs. As a result the installation and handover ran very successfully.

Andy Wanstall, Project Engineer, Alexir Partnership

Imio is a very user friendly application and our operators were competent within hours! Conveyor Networks delivered a solution bespoke to our requirements and we are fully recognising the benefits.

Lawrence Hart, Contract Development Manager, Kuehne + Nagel Ltd

DEBENHAMS

Johnson & Johnson

WHSmith

hmv.com

Trinity Mirror plc

KUEHNE+NAGEL

To deliver excellence in our products and services whilst achieving ethical and profitable growth.

Software

We own develop and support intelligent warehouse software for Ecommerce, Retail and FMCG. Imio is a scalable product suitable for operations ranging from manual to fully automated single and multi-site distribution. Imio interfaces with existing WMS/host and carrier systems giving complete order visibility throughout despatch and delivery. Available in 3 suites with a range of apps.

Controls

We provide bespoke, fully integrated control and automation solutions across all types of interfaces for mechanical and electrical operations. We design and code control software in-house ranging from simple systems to complex larger scale projects.

Automation

Automation integrates and streamlines warehouse processes making them more flexible, predictable and efficient. Conveyor Networks are Automation and Control specialists with the knowledge and experience of designing, commissioning and installing fully integrated automated solutions. Our clients are able to improve productivity and customer service.

Factory

Conveyor Networks provide fully integrated solutions (including hardware, controls and software) which give our FMCG clients real return on investment, allows them to access the latest technologies and helps them become more efficient and productive. Our project managers manage diverse technology, multiple suppliers and all site activity.

Logistics

At Conveyor Networks we are experts in designing and installing bespoke retail and e-commerce automation solutions. The most common problems we help our clients solve are; Internal movement of goods, picking errors, product and process traceability, efficient replenishment of stock, seasonal sales fluctuations, next day delivery.

Support

Whether it's 24/7 emergency cover or ongoing maintenance we can tailor a support package to suit your individual needs and ensure you get the best possible performance from your system. Using our in-house expertise and supplier partnerships we can minimise disruption and downtime. Includes Servicing, Spare parts and PLC and software support.
