

Customers

What they say about our service and imio

“ This automated solution supports our approach to meeting the challenges of servicing customer orders within tight timescales across the range of delivery options that we now offer. Conveyor Networks have proved to be partners in service delivery working with a number of different parties and continuing to help us refine the system and realise its full potential. ”

Anthony Leach, Head of Logistics
Debenhams

“ imio is a very user friendly application and our operators were competent within hours! Conveyor Networks delivered a solution bespoke to our requirements and we are fully recognising the benefits. ”

Lawrence Hart, Contract
Development Manager
Kuehne + Nagel Ltd

“ As Gameseek has grown we need visibility and control of our operation from Goods In to Despatch. Having already worked with Conveyor Networks we value their collaborative approach and quality of the product. ”

Stephen Stayley, MD

GAMESEEK imio WMS.

Gameseek and Conveyor Networks are collaborating to build imio WMS.

Developed from a WCS, already in use at QVC, Debenhams and Euro Car Parts, imio will give Gameseek complete visibility and control of all their warehouse operations and allows both businesses to get the system working perfectly before market roll out in the first half of 2016.
