

The smart finance solution for your Warehouse Automation And Software Project

You don't have to use cash or bank facilities to fund your Warehouse, Automation and Software Project. Instead of tying up large amounts of capital, a smarter alternative could be to use a lease facility. Leasing is a tax efficient and cost effective method of achieving your ideal Warehouse Operations whilst retaining capital in your business.

That's is why **Conveyors Network** have partnered with **Plus Finance**, a leading provider in this field.

The benefits of using lease finance

Increased use of Alternative Finance

The finance landscape is changing; businesses are moving away from traditional methods (bank loans & overdrafts) and increasingly using alternative finance options including leasing.

Maximise Cash flow - No large upfront payment

Cash is the lifeblood of any business. Leasing means no large up-front payment so you keep the cash in your business, preserving liquidity and freeing up valuable working capital for use elsewhere.

Fixed payments for accurate budgeting

Unlike other methods of finance, payments are fixed for the duration of the lease period making budgeting more accurate, and eliminating unexpected variations such as increases in interest rate.

Why choose us?

- Specialists in warehouse and all other commercial interior lease options
- Wide range of funding partners
- Established and experienced
- Enthusiastic and helpful
- Support team available

Tax advantage

If you lease your Automation and Software Project, the repayments are 100% allowable against taxable profit. As the only method of finance offering these tax savings, leasing is the most cost efficient method of financing. For high tax paying organisations it can offer significant savings. In some cases it can even work out better than paying cash.

Existing Bank Credit Lines

Leasing leaves your bank credit lines intact and free for other business development or investment purposes, so bank overdrafts are unaffected.

Spread the payments for the asset

Spread the cost with regular payments so you pay as you benefit from this asset. Terms available from 3-5 years

Quick decisions

Securing a lease agreement is far quicker than obtaining a bank loan or overdraft extension, so orders are processed promptly and with fewer obstacles.

Get the best solutions now

Current budgets will dictate the scope of your project, but with flexible payment options to suit your business, leasing allows you to achieve the specification of your choice so you're less likely to have to make short term compromises.
